## OBJECTIVE:

---

Skilled Front-end Developer adept in HTML, CSS, JavaScript, Git, GitHub, Figma. Seeking opportunities to leverage expertise in delivering top-tier, scalable solutions across frontend platforms.

## PROJECTS:

---

### 1. Recharge Payment App (Aadharpay):

- Technology Stack: HTML, CSS, JavaScript, AJAX, PHP, MySQL
- Developed and launched a recharge payment application that garnered 25,000 users and generated revenue of 12 lakhs within seven months of going live. Implemented frontend using Flutter and backend using PHP and MySQL.

### 2. Typing-express (Typing web site)

- Technology Stack: HTML, CSS, JavaScript.
- Description: Typing-Express is an interactive and user-friendly typing website designed to improve typing speed and accuracy. It offers real-time progress tracking, customizable typing exercises, and engaging challenges to help users enhance their typing skills efficiently

### 3. Mechanical Department Course Schedule (Prarambh Development Cell):

- Technology Stack: HTML, CSS, JavaScript.
- Description: The **Mechanical Department Course Schedule** under the **Prarambh Development Cell** is a structured program designed to provide students with a comprehensive learning roadmap

### 4. E-Commerce Website of Pan Shop:

- Technology Stack: HTML, CSS, JavaScript.
- Description: The **Pan Shop E-Commerce Website** is a digital storefront designed to provide customers with a seamless online shopping experience for a variety of paan (betel leaf) products and related items. The platform enables users to browse different flavors, customize their orders, and place deliveries with ease.
